NO. 002/13 JAN 2013

SVHC CANDIDATE LIST EXPANDS TO CONTAIN 138 ENTRIES

On December 19 2012, 54 new substances were added to the [Candidate List of Substances of Very High Concern \(SVHC\) for Authorization](#). The European Commission has achieved its proposed goal of having 136 SVHCs on the candidate list by the end of 2012, and the list now contains 138 substances in total. The Commission has started discussing the target of getting all known and relevant SVHC substances identified by 2020, and developing a roadmap for this which is expected to be published at the end of the year.¹

OBLIGATIONS FOR EU ARTICLE PRODUCERS AND IMPORTERS

According to Article 33 of REACH, any supplier of European Union (EU) and European Economic Area (EEA) of articles containing SVHC Candidate in a concentration above 0.1% (w/w) shall provide safe use information to the recipients upon supply and consumer upon request within 45 days. This year, the German Environmental Agency has launched an [online checking system of SVHC in everyday products](#), consumers can enter a product barcode number in the tool and a request is then automatically sent to the product manufacturer.

Notification is required when SVHC concentration >0.1% (w/w) in an article and the overall quantity in all articles is more than 1 tonne per year per producer or importer. In November

2012, ECHA had launched a [new web form for notifying SVHCs in articles](#), EU producers and importers of articles can now submit notifications through the new online web form. The notification deadline for the 13 SVHCs included in the candidate list on June 18 2012 is already passed. The notification deadline of the newly added 54 SVHCs is June 19 2013.

THE NEWLY ADDED SVHCS

Among the 54 newly added SVHCs, there are four Perfluorinated compounds (PFCs), namely Henicosafafluoroundecanoic acid, Heptacosafafluorotetradecanoic acid, Pentacosafafluorotridecanoic acid and Tricosafafluorododecanoic acid, those long chain perfluorocarboxylic acids (PFCA) are used in the production of fluoropolymers and fluorotelomers and as additives and components in industrial and consumer products such as outdoor clothing.

A [European Parliament report](#) states that endocrine disruptors should be regulated, preferably as SVHC within the REACH framework. In the current SVHC candidate list update, two substances were identified as SVHC due to their endocrine disrupting properties, they are 4-(1,1,3,3-Tetramethylbutyl)phenol, ethoxylated and 4-Nonylphenol. Moreover, three substances, C,C'-azodi(formamide), hexahydro-2-benzofuran-1,3-dione and hexahydromethylphthalic anhydride were the first respiratory sensitizers included in the SVHC Candidate List.

The non-exhaustive information about potential uses of the 54 newly added SVHCs is summarized in Table 1.

¹ [Candidate List – the way ahead](#)

TABLE 1. POTENTIAL USES OF 54 SVHC CANDIDATES PUBLISHED BY ECHA ON DECEMBER 19 2012

NO.	SUBSTANCE	CAS NO./EC NO.	CLASSIFICATION	POTENTIAL USES
1	[Phthalato(2-)]dioxotrilead	69011-06-9/ 273-688-5	Repr. 1A	<ul style="list-style-type: none"> Used in PVC processing
2	1,2-Benzenedicarboxylic acid, dipentylester, branched and linear	84777-06-0/ 284-032-2	Repr. 1B	<ul style="list-style-type: none"> Used as plasticizers in plastic material
3	1,2-Diethoxyethane	629-14-1/ 211-076-1	Repr. 1B	<ul style="list-style-type: none"> Used as solvent and diluent for detergents Used as solvent for ester gum and some resin Used in ink formulations
4	1-Bromopropane	106-94-5/ 203-445-0	Repr. 1B	<ul style="list-style-type: none"> Used in textile, ink, adhesive and coatings
5	3-Ethyl-2-methyl-2-(3-methylbutyl)-1,3-oxazolidine	143860-04-2/ 421-150-7	Repr. 1B	<ul style="list-style-type: none"> Used in paint for polyurethane, polyurethane finishing and sealants
6	4-(1,1,3,3-Tetramethylbutyl)phenol, ethoxylated	-	EQC	<ul style="list-style-type: none"> Used as surfactants Used in the formulation of paints Used as textile and leather auxiliaries Used in cleaning of metal surfaces
7	4,4'-Methylenedi- <i>o</i> -toluidine	838-88-0/ 212-658-8	Carc. 1B	<ul style="list-style-type: none"> Chemical intermediate for dyes
8	4,4'-Oxydianiline	101-80-4/ 202-977-0	Carc. 1B, Muta. 1B	<ul style="list-style-type: none"> Chemical intermediate for polyimide and poly(ester-imide) resins
9	4-Aminoazobenzene	60-09-3/ 200-453-6	Carc. 1B	<ul style="list-style-type: none"> Used as dye for lacquers, varnishes, wax products and styrene resins
10	4-Methyl- <i>m</i> -phenylenediamine	95-80-7/ 202-453-1	Carc. 1B	<ul style="list-style-type: none"> Used in the preparation of dyes, polyurethane, impact resins, polyimides with superior wire coating properties
11	4-Nonylphenol, branched and linear	-	EQC	<ul style="list-style-type: none"> Used as detergent and textile auxiliaries Used as a component of phenolic resins used in paper coatings Used as antioxidants and plasticizers in plastic products Used in paints and lacquers, varnishes, coloring agents, printing inks, adhesives and sealants Used in the manufacture of phenol-formaldehyde-resins used in rubber
12	6-Methoxy- <i>m</i> -toluidine	120-71-8/ 204-419-1	Carc. 1B	<ul style="list-style-type: none"> Chemical intermediate for dyes
